

docΩmega™

ACBS GMS PBS

Description

Food for special medical purposes.

A powdered blend of Docosahexaenoic Acid (DHA) on a carbohydrate base.

Indications

docΩmega™ is for the dietary management of inborn errors of metabolism from birth.

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

docΩmega (4g) = 200mg of DHA

Preparation Guidelines

docΩmega may be used in a variety of ways:

- Mixed in with protein substitute.
- Added to modular feeds.
- Dissolved in water.
- Incorporated into other permitted food or drink.

Once prepared use immediately.

IMPORTANT NOTICE

Must only be given to patients with proven inborn errors of metabolism under strict medical supervision.

Suitable from birth.

Infants under 12 months: when made into a solution or added to infant formula, use immediately and discard any remaining within 1 hour.

Not for use as a sole source of nutrition.

For enteral use only.
