

CLINICAL EVIDENCE

Science-based solution gives confidence in the diagnosis and treatment of dysphagia

8 clinical studies demonstrate its unique features.

+ ACCURATE DIAGNOSIS

- ThickenUp® Clear can be used as a thickening tool for diagnosing dysphagia
- ThickenUp® Clear shows reliable rheological properties which make it accurate for diagnosing dysphagia
- ThickenUp® Clear can be used as a non-invasive device for swallowing screening

+ SAFE EFFECTIVE DYSPHAGIA MANAGEMENT

- ThickenUp® Clear improves swallowing efficacy oral control and swallowing safety
- Increasing the viscosity of the bolus with ThickenUp® Clear reduces the number of aspirations and the penetration-aspiration scale (PAS) score.
- In a comparative study, ThickenUp® Clear shows greater efficacy improving swallowing safety.
- ThickenUp® Clear is safe and effective in the management of dysphagia, in stroke patients

+ EXCELLENT COMPLIANCE AND TOLERANCE

- ThickenUp® Clear shows good compliance, excellent gastrointestinal tolerance and wide versatility

Studies show results on high level of safety, efficacy, as well as excellent compliance, and tolerance. Moreover, it has proven to be useful both as a diagnostic and screening tool in patients with swallowing difficulties.
